

# Acceptance of Micro-modules in the Computer Room

TY micro-modules can be developed for a duration of up to 10, 20, or 30 hours, whilst having the flexibility for schools to decide on the most suitable balance of class contact time and self-directed, ...

With the aim of assisting students in acquiring the practical knowledge required for sustainable engineering practices, a new intervention method in the form of flipped micro-modules ...

All components within this module can be prefabricated in the factory, flexibly disassembled and transported, and quickly assembled on site for use. The micro-module can be rapidly deployed and ...

Von Neumann introduced me to that paper and at his urging I studied it with care. Many people have acclaimed von Neumann as the "father of the computer" (in a modern sense of the term) but I am ...

The purpose of evaluating the micro-module is to find out, from both the students' and teacher's perspective, the success or otherwise of the module and how it can be improved for the future.

As you plan and develop micro-modules for your course, at the same time you can also gain inspiration and learn from various style and micro-module example videos available from the link below.

In 2017-18 term 1, the micro-modules set was coupled with an assessment item, an online discussion forum, thereby making the micro-modules compulsory. This study aims to give a comprehensive ...

It aims to evaluate engineering students' acceptance of using the flipped micro-module application in existing curriculums and discusses how this pedagogical approach facilitates learning ...

With the aim of assisting students in acquiring the practical knowledge required for sustainable engineering practices, a new intervention method in the ...

By understanding the feasibility and factors affecting acceptance, educators can harness the potential of micro-videos to enhance engineering education.
