

Application Solution of Intelligent Power Distribution Box in Exhibition Hall

A major immersive digital art venue in Israel required a customized low-voltage power distribution solution capable of supporting dynamic electrical loads, precise timing coordination, and ...

Our hardware suite transforms electrical panels into intelligent energy hubs. Specifically, our industrial-grade devices deliver real-time monitoring, predictive maintenance, and seamless ...

Find your reliable power distribution for trade fairs and events here. With our stationary and mobile solutions for all areas of application.

The lack of intelligent power management of mobile booth boxes and integrated booth boxes has led to loopholes, high costs and low efficiency in the safety regulations of exhibition hall electricity ...

Two ranges and four enclosures of ACCESS by CUBE power distribution boxes, designed to fit in perfectly with all booth configurations and available in a wide range of electrical architectures.

Our solutions for smart low voltage electrical installations are tailored to maximize continuity of service, energy efficiency and allow easy upgrades all along the lifecycle of the system.

Solution we offer Power Distribution Consultancy for event temporary power distribution.

The distribution box is embedded with the DTU distribution device, distribution device power module, and distribution device power supply. By leveraging the intelligent remote monitoring function, you ...

Compared with the traditional power distribution box, it is safer to cut off the strong power supply remotely, and it can save energy through the timing mode while controlling the equipments ...

It comprehensively utilizes big data, cloud computing, and mobile internet to build an intelligent temporary power box management platform, mainly addressing issues such as usage management ...
