

Shop fiber optic test and installation equipment, including OTDRs, OLTS certifiers, fusion splicers, and fiber cable assemblies for professional network work.

AFL has a complete range of fast, easy-to-use tools that inspect and clean fiber endfaces. Using them consistently eliminates the #1 cause of network outages - dirty connectors.

Fluke fiber testers and tools help ensure the performance of a fiber network at installation, or before and after adding or upgrading equipment.

While approximately 175 adapters and kits are available for automatic cable testing, there are no universal devices capable of testing Copper, RF, or Fiber cables. The automatic tester must ...

Fluke Networks has a wide range of Fiber Optic testing products to help certify that power losses are within standards and to troubleshoot broken and high loss links on single-mode and multimode fiber ...

Industry's first AI-driven endface analysis for simplex, duplex and multi-fiber connectors. Delivers reliable and repeatable results with a self-contained, fully automated tool for zero-button testing all day--no ...

This full function fiber inspection scope is a fully automated tool to check and analyze fiber optic connector end faces for dirt, condition, and quality as per IEC61300-3-35 requirements. Images are ...

Portable fiber optic tester for power, fault, and performance analysis for network maintenance.

Fiber optic connector inspection probes are fully automated tools that use light pulses to assess the connectivity and continuity of fiber optic end faces and bulkheads.

View OTDRs, power meters & adapters for all your fiber optic inspection needs.
