

Data Center Hot & Cold Aisle Containment Features: Delivers controlled airflow, prevents hot/cold air mixing, and reduces cooling energy costs across the data center. Built for data centers, colocation ...

Modular sliding or swinging door versions available with optional "soft" self-closing mechanisms and hold-open provisions. Accommodates aisle widths from 36" wide to 96" wide. Standard ...

Two cabinets and roof ceiling form a unit of self-contained closed space/aisle, it is called hot or cold aisle containment, can be installed separately, provide scalable solutions as demand change or ...

This solution caps cold air at the tops of cabinets and across the aisles, and directs it onto densely populated racks using doors installed at the end of the row.

Standard 19-inch Design: Fits standard server racks for efficient data center layout. High-Quality SPCC Cold Rolled Steel: Durable and resistant to corrosion for long-term use. Stock Availability: Quick ...

Modular Data Center is designed for equipment rooms, medium- and large data centers. Standardized components, de-engineered, ensure data center production in factories and realize the overall ...

Adaptable to hot and cold aisle containment, the Vertiv Aisle Containment system allows you to deploy containment before or after racks are installed to simplify installation and speed deployment of new ...

Modular designed frame made of cold roll steel, with thickness  $\geq 1.2\text{mm}$  to ensure the firmness and security. Aisle containment in the data center requires that cabinets are aligned in a hot aisle/cold ...

Cool Shield(TM) containment offers state-of-the-art hot and cold aisle containment solutions designed to maximize data center efficiency while significantly reducing ...

Containment panels or strips create a partition to isolate either the server supply air (cold aisle) or the exhaust air (hot aisle). Preventing the supply and exhaust air ...

Hot & Cold Aisle Containment Panels at bulk/wholesale pricing. Used for aisle containment solutions in mission-critical data centers to ensure consistent temps.

Two cabinets and roof ceiling form a unit of self-contained closed space/aisle, it is called hot or cold aisle containment, can be installed separately, provide scalable ...

Cool Shield(TM) containment offers state-of-the-art hot and cold aisle containment solutions designed to

maximize data center efficiency while significantly reducing power consumption.

A modular kit of adjustable beams that connects aisle containment frame end kits and supports clear roof panels in an aisle containment system designed to ...

Rigid doors are one of the most popular products in our containment portfolio, and are used to seal of the end of a data center aisle and keep hot and cold air from recirculating back into that aisle.
