

ADSS (All-dielectric Self-supporting) optical fibre cable is a type of self-supporting aerial fiber optic cable designed for aerial installation and deployment and is suitable for various outdoor applications. GL ...

Deploy Frigate's ADSS & aerial cables for cost-effective, self-supporting network expansion. UV-resistant, lightweight, and weatherproof cables ensure uninterrupted data flow in harsh outdoor ...

These cables offer reliable transmission over a broad temperature range. They can be installed either pole-to-pole, or lashed to existing infrastructure available for long medium & short span routes.

Aerial ADSS (All-Dielectric Self-Supporting) optical cables are designed for direct aerial installation without the need for metallic support elements. Fully dielectric and lightweight, they are ideal for high ...

This cable incorporates innovative waterblocking materials, eliminating the need for traditional flooding compound and providing efficient and craft-friendly cable preparation.

OPTRAL offers ADSS dielectric cables with double jacket for aerial installation for different span distances.

ADSS fiber optic cable structure is currently divided into two categories: layer stranding and central bundle tube.

AFL's ADSS (All-Dielectric Self-Supporting) fiber optic cable is designed for aerial installation without the need for messenger wire. Lightweight, non-metallic, and durable, it's ideal for power utility and ...
