

Optical components that create two beams by splitting incident light are beamsplitters. Read more about the different types of beamsplitters at Edmund Optics.

We ship items as soon as they become available, so if you order multiple quantities, you may receive them in separate shipments. A special order item will need to ship to our warehouse from the ...

Beamsplitters operate by splitting light based on reflection/transmission (R/T) ratios or specific properties like polarization or wavelength. Available in cube and plate configurations, these versatile ...

This item requires 3-5 Business Days to process and prepare for shipping. Product Information: SPLITTER, BEAM HD W/CAMERA F/OP-C12 & OP-C16

Beamsplitters are optical components used to split input light into two separate parts. Beamsplitters are common components in laser or illumination systems. Beamsplitters are also ideal for fluorescence ...

Beamsplitter coating designed for separating the incident light beam reflected and transmitted with a predetermined intensity ratio . Generally the angle of incidence of light on the beam-splitting coating ...

Thorlabs offers a wide range of optical beamsplitters. Our plate beamsplitters have a coated front surface that determines the beam splitting ratio while the back surface is wedged and AR coated in ...

This beam splitter is designed for use with Models OP-C12 and OP-C16 ENT microscopes with HD cameras, from BR Surgical and sold separately Both those microscope models feature LED ...

This product is not intended to diagnose, treat, cure, or prevent any disease."

Our beam splitters are made from high grade glass material with laser grade surface flatness & surface quality for tighter tolerance on the splitting ratio.
