

Our UfiSpace 800G networking solutions, featuring the standalone Tomahawk &#174; 5 Ethernet Switch Series and the Distributed Disaggregated Chassis (DDC) equipped with Jericho3 and Ramon3, are ...

Celestica's 800G switches deliver unparalleled high-density and high-performance, the ideal foundation for large scalable data centers.

The Edgecore DCS560 / AIS800-64O is a high-performance, low-latency switch ideal for data centers, AI/ML clusters, and high-performance computing. It features 64x ...

The Cisco N9364E-SG2 are 2-Rack-Unit (2RU) 64-port 800 Gigabit Ethernet switches available in both QSFP-DD and OSFP form factors. They support 51.2 Tbps of bandwidth and ...

Featuring the NVIDIA Spectrum-X800 SN5600 800 gigabits per second (Gb/s) Ethernet switch and NVIDIA&#174; BlueField SuperNICTM, the Spectrum-X800 platform provides the optimal solution for ...

It is a small-form-factor hot-pluggable transceiver module integrated with a high-performance VCSEL laser and high-sensitivity PIN receiver. It is compliant with 800G Ethernet specifications and the ...

Offering up to 51.2 Tbps throughput, Arista's 7060X6 series delivers the highest density of 800 GbE switching in a single chip platform.

The S9321-64E QSFP-DD is an 800G data center switch featuring 64 x 800GE ports, 51.2 Tbps capacity, and advanced traffic management, ideal for AI/ML workloads.

FS 400/800G PicOS&#174; data center switches offer high speeds and port densities to meet the network deployment requirements of various scenarios and the evolving requirements of next-generation data ...

The Accton AS9817-64O is an 800G high-performance switch platform for modern data center applications. The switch provides line-rate L2 and L3 switching across the 64 x 800 GbE ...

The SSE-T8164 comes with 64 OSFP 800G ports in a 2RU form factor to meet the leaf, spine and super spine datacenter architectures. The interfaces provide flexibility to meet a variety of speeds and use ...
