

Canadian High Temperature Resistant Fiber Optic Connectors 2026 Model

Take fiber optics onto the field without any compromise on sealing, cleaning and performances. Tested for harsh and extreme environments.

We're proud to unveil our latest breakthrough: Ultra-Low Loss (ULL) fiber optic connectors. Designed to minimize insertion loss to unmatched levels, these high-performance connectors enable greater ...

High temp fiber optics are used in situations where the temperature is above a certain limit for most plastic fibers. These are usually used in thermal process applications and Banner offers the widest ...

Corning's High Temperature Fibers are designed for applications requiring improved fatigue resistance, high usable strength, and excellent resistance to higher temperatures and hydrogen permeation.

MEISU developed high-temperature resistant optical devices with SM fiber and PM fiber for fiber sensing system. By applying a special high-temperature coating to the normal PM fiber, it provides multiple ...

High-density MT ferrules are packaged in precision-machined rectangular aluminum shells with electroless nickel finish, or passivated stainless steel shells for higher temperature applications.

All our ranges of bundles, connectors, special fiber optic cables and patchcords, couplers, multiplexers, hermetic feedthroughs, etc. can be customised to meet your requirements.

Please use the most current version of Acrobat®; Reader®; to ensure compatibility with all PDF files.
