

# Case Study of Corrugated Conduit Construction for Communication Systems in a Norwegian Data Center

We have extensive experience working with multiple data center tenants, providing structural steel, electrical conduit and modular and traditional construction services that expedite completion. Steel ...

Electrical conduit plays a large role in data center construction. Learn why more engineers and contractors rely on fiberglass conduit elbows.

Considered an integral part of the construction phase, the long-term return on investment on installing a flexible, easily scalable conduit network system is priceless.

If you're looking for a flexible, strong, and cost-effective solution for cable management, Shielden corrugated conduit systems are built to perform--whether it's for a solar farm, data center, ...

Building these interconnections is a construction service that Electric Conduit Construction (ECC) provides. On a recent project the scope of work called for connecting two data centers with fiber optic ...

There are methods using robots to install fiber optic cable in storm sewers or other underground pipes. They have been used in center cities where construction is ...

There are methods using robots to install fiber optic cable in storm sewers or other underground pipes. They have been used in center cities where construction is difficult but not widely.

In this webinar, learn about electrical conduit selection and installation for today's data centers. Content will touch on National Electrical Code (NEC) requirements, best practices for design ...

The deep interior of a mountain situated on an island in a remote Norwegian fjord is the unique location for a Tier III+, carrier-neutral, high-security data centre.

Abstract:The design, installation, and protection of wire and cable systems in substations are covered in this guide, with the objective of minimizing cable failures and their consequences.

Corrugated steel pipe, with its long lengths, positive joints and flexibility to conform to shifting soil, provides a most dependable means of solving erosion problems.
