

We would like to provide you with great customer service while delivering the highest quality fiber optic ferrules. We specialize in odd size ID bores and custom applications.

Our Standard Ferrules are commonly used as key components in fiber optic connectors, but they can also be utilized in various specialized applications. It is Made from zirconia ceramic, these ferrules ...

The "tiny white tube" in the center of a fiber optic connector is known as a Ceramic Ferrule. It is a critical component used to align and protect the optical fiber at the termination point.

Zirconia ceramic ferrules come in various styles to fit different connector types. They provide low insertion loss, low back reflection and superior durability over repeated matings while ...

High-precision Fiber Optic Connectors and Zirconia Ceramic Ferrules for superior network termination. Shop widely used types (SC, LC, FC, ST) and termination kits suitable for Single-mode and Multi ...

Through precision machining, advanced processes, and strict quality control, we transform raw ceramics into finely crafted components integral to our fiber optic connectors.

Our Standard Ferrules are typically used as sub-components within fiber optic connectors, but can also be integrated in various specialized applications. They are made of zirconia ceramic, which offers the ...

PFP SC 2.5mm OD Multimode Ceramic Zirconia Ferrule Assemblies From \$1.70 Excluding Sales Tax Add to Cart

Ceramic materials. Ceramic ferrules are well known for having high durability and the highest levels of dimensional control, making them suitable for use in all fiber applications (both singlemode and ...

Our ferrules and sleeves are available in standard size and shape configurations. For standard products, please see the following. Kyocera can machine the end face of the ferrule based on the customer's ...
