

Compatible Anti-tracking high-speed optoelectronic connections from Nigerian suppliers

Our fiber optic termini includes MIL-PRF-29504, ARINC 801, JSFC, and MT ferrules. Both the contacts and termini can be housed in a wide variety of custom high-speed connector designs. We can then ...

The portfolio addresses the analog interfaces between electrical and optical domains providing solutions to meet the demanding size, power and signal integrity requirements of today's high speed networks ...

50 Gbps High-Speed Optical Module Card in an adapter card interface enabling two Amphenol Ruggedized SCFF modules mounted and soldered, boosting performance and versatility. Your ...

This wide offering gives system architects full flexibility and a complete range of products to meet all high-speed storage and high-density IO system needs. Fully compliant to SAS 3.0 ...

We provide high-quality OEM-compatible optical transceivers and cables that are rigorously tested for performance and compatibility with leading networking equipment.

With over 30 years of experience in manufacturing, OSI Optoelectronics offers high-performance, high-reliability RoHS-compliant Pulse Oximeter Sensors for patient monitoring and care.

Our fiber optic termini includes MIL-PRF-29504, ARINC 801, JSFC, and MT ferrules. Both the contacts and termini can be housed in a wide ...

This design delivers excellent noise immunity, characterized by high common mode transient immunity and power supply rejection specifications, and allows these devices to operate in noisy industrial ...

The "All Dielectric Self-supporting (ADSS)" cables are designed for aerial self supporting application at short, medium and long span distances. Adopted for high voltage, middle, small span conditions in ...

Our optoelectronic packages are designed for a variety of industries and production volumes. With a vertically-integrated powder-to-package process, our optical packages maintain high quality and ...

AI-driven speed demands are shifting signals from the PCB to direct-to-chip connections. The modular VFI system uses industry-standard MT ferrules and rugged, plug-and-play modules to provide ...
