

Ferrules Direct has a wide variety of replacement parts to choose from. If you can't find what you need, please contact us today so we can help!

High performance fiber optic connectors used in environments requiring durability after repeated mating, Low insertion loss and low back reflection.

Ferrules can be made in a variety of high purity thermal shock resistant ceramic materials, such as 99% alumina, as well as metallic alloys. For more information or to receive a quote for these products, ...

We offer ceramic structural parts and ultra-precision machining services with different advanced ceramic materials for the rapid production of custom ceramic assemblies.

Choose from our selection of ferrules, including over 1,800 products in a wide range of styles and sizes. Same and Next Day Delivery.

Patented Blasch boiler tube ferrules are pre-engineered for each and every boiler tube installation. Customers can expect to receive ferrules that are properly sized, accurately molded, and completely ...

Our ferrules and sleeves are available in standard size and shape configurations. For standard products, please see the following. Kyocera can machine the end face ...

Our ferrules and sleeves are available in standard size and shape configurations. For standard products, please see the following. Kyocera can machine the end face of the ferrule based on the customer's ...

Standard Ferrules Our Standard Ferrules are typically used as sub-components within fiber optic connectors, but can also be integrated in various specialized applications. They are made of zirconia ...

While some industrial applications use ceramic ferrules for high-temperature stud welding, the primary, high-technology market is focused on fiber optics. This guide provides a definitive look at these high ...

Industrial Ceramics supplies a full range of custom boiler protection tubes (ferrules) and custom insulating gaskets for use in high temperature boiler. Some typical ferrule designs are listed here.
