

Co-packaging of laser diodes, PICs, SOAs, photodiodes, filters, and modulators into customized optoelectronic engines. See our customized packages.

Discover FLC's selection of laser diodes, featuring the broadest wavelength spectrum globally and customizable packaging options.

Main applications is metal processing of reflective materials, it is also well suitable for 3D printing and other industrial, medical, scientific and laser display applications.

We offer custom blue laser diode modules across multiple power levels, wavelengths, and packaging formats. Whether you require compact integration or high-output performance, we tailor ...

This standardised approach results in no development costs, shortened lead times and reliable laser diode modules in industry standard packages. Our flexible business model allows for ...

CEO's diode engineers are highly experienced in custom designs for specialized pumping and direct diode applications. We can match your specifications to our standard products or design the ...

Get Quotations on your custom Laser Diode requirement from multiple manufacturers via GoPhotonics. Enter your requirements, details and upload any supporting files.

Our full suite, end-to-end laser diode design, fabrication and packaging capability means we can provide custom solutions to meet your specific form factor, device architecture and package integration ...

This standardised approach results in no development costs, shortened lead times and reliable laser diode modules in industry standard packages. Our flexible business model allows for customisation ...

List of Diodes' packaging materials, including outlines and specifications for BCD, carton, label, SMD, and through-hole product packaging.

We provide the industry's widest selection of laser diode wavelengths and package options, from standard free-space to fiber-coupled designs, enabling seamless integration into any system ...
