

High voltage rigid and flexible (braid or laminated) busbars and custom terminals/lugs for any application. Custom geometry with overmolded features for securement, routing, and/or sealing.

Spike provides custom bus bar solutions for efficient power distribution, meeting UL & ISO 9001 standards. Ideal for EVs and solar ...

Busbars are metal bars that can be composed of numerous alloys but are most commonly copper or aluminum. Typical busbar applications include switchgear, panel boards, power invertors, powered ...

Whether you need tailored dimensions, materials, or configurations, our custom busbars ensure optimal performance, reliability, and safety in power distribution applications.

High voltage rigid and flexible (braid or laminated) busbars and custom terminals/lugs for any application. Copper and Aluminum. Custom geometry with overmolded features for securement, ...

The experienced team at American Industrial Company (AIC) can fabricate custom busbars to your requirements for high and low-voltage power distribution applications.

Spike provides custom bus bar solutions for efficient power distribution, meeting UL & ISO 9001 standards. Ideal for EVs and solar applications. Get a quote today!

Discover our high-voltage custom busbars for electric vehicles. Supports a wide range of applications including but not limited to battery packs, battery distribution units, and electric propulsion and control ...

High volume busbar production: employing craft precision. One of the signature products developed by Intercable Automotive Solutions are our custom made high-voltage busbars manufactured to client ...

At Datum, we specialise in custom, thin metal, busbar manufacturing, delivering precision copper, aluminium, nickel and nickel plated steel busbars for high-voltage battery systems, including EV ...

Leading provider of busbars for electric vehicles: Your partner for customized Copper, Aluminum, and Flexible busbar solutions.
