

Primax critical distribution panels offer the most efficient way to protect your critical loads. The option of using a combination of branch fuses in series with circuit breakers achieve ultimate protection when it ...

Distribution Series 3 - 1RU, 200-amp dual-bus, GMT-fuse DC distribution panel for 24/48 VDC installations. Each bus supports 100 amps peak current and supports 10 GMT fuse-protected ...

Designed for both AC and DC power management, these panels are essential for controlling and protecting onboard circuits, whether you're powering navigation electronics, lighting, or galley ...

Price and other details may vary based on product size and color. Need help?

The Distribution Series 3 Dual Bus DC Distribution Panels are designed to be used in 12V, 24V or 48VDC applications. All models feature either 12 fuse- or breaker-protected outputs (model ...

Understand multiengine aircraft electrical systems: paralleling generators, split-bus vs. parallel distribution, and transport aircraft power logic.

Square D(TM) NQ Separated Distribution and Split Bus Panelboards come Factory Assembled with copper bus, with or without an integral Main Circuit Breaker. For more detailed information about Square D ...

Essential DC power is from a transformer rectifier unit (TRU) powered from the essential AC bus. Standby AC and DC bus power is normally from the respective essential supplies; when selected ...

NQM36L1CSB - Panelboard interior, NQ, main lugs, 100A, Cu split bus, 36 pole spaces, 1 phase, 2 wire, 240VAC, 48VDC.

In a modern electrical panel, power comes in through one large main breaker. Flip that breaker, and everything in the house goes dead. A split-bus panel doesn't work that way. Instead, ...
