

With cut-through switching, wire-speed performance, and ultra-low latency, the 5945 series offers flexible options for port density and speeds, including 100GbE, 40GbE, 25GbE, and 10GbE, to fit ...

Low Insertion Force Bezel Cages for high density faceplates. The backwards compatibility with QSFP+/QSFP28 cables and transceivers and the flexibility of ...

IPv4 and IPv6 support with a full Layer 2 and Layer 3 feature set, plus PTP 1588v2 for boundary clock, transparent clock, end-to-end, or peer-to-peer synchronization. HPE IMC Orchestrator and Analyzer ...

The HPE Networking Comware Switch Series 5960 supports redundant, hot-swappable power modules and varied fan speeds to meet the actual demands, thereby enabling a dynamic and highly available ...

Equipment equipped with QSFP-DD ports supports backward compatibility with existing QSFP+, QSFP28, and QSFP56 modules. This feature provides exceptional flexibility and a smooth ...

Low Insertion Force Bezel Cages for high density faceplates. The backwards compatibility with QSFP+/QSFP28 cables and transceivers and the flexibility of the entire QSFP portfolio offer a simple ...

Featuring a 41.5mm*107.5mm*9.5mm form factor, the CFP8 module delivers four times more bandwidth than existing 100G solutions. Its electrical interface has been generally specified to ...

QSFP28 (Quad Small Form-factor Pluggable 28): Doubling the speed of QSFP+, it delivers 100G connectivity while maintaining compatibility with QSFP+ cages. However, its higher power ...

Agile, scalable switching--from edge to core, across data center, campus and branch.

With the HPE 5945 Series, data centers can now support up to 100GbE per port, allowing high performance server connectivity and the capabilities to handle virtual environments.
