

In such cases, an external cable routing system provides a viable solution, allowing riders to enjoy the benefits of a dropper seat post without needing to modify or replace their frame.

Common exposed locations where this is found are on basement foundation walls or across the faces and ends of studs and joists in unfinished framed spaces. Learn if exposed wire is ...

I suspect that a well-done exposed cable scheme is lower friction than a full housing. Especially for indexed shifters, the cable housing changes effective length with tension and temperature changes.

We wanted to keep the sleek and svelte look of the carbon frame and not disturb it with exposed cable housing on the surface of the tubes so this meant purposeful design and engineering ...

It works as it should, there are less places for water/mud/dirt to get into, with full length cable, and makes cabling up alot faster. Also cuts down on those "that could do with being 1/2 inch ...

External cables are far more likely to be present on your winter hack than your summer race machine, but if you do opt for this approach, there is a further choice: do you run your external...

Ironically, it's not muck and corrosion on the exposed parts of the cable that causes the problem, it's water causing corrosion inside the housing. This manifests itself ...

Ironically, it's not muck and corrosion on the exposed parts of the cable that causes the problem, it's water causing corrosion inside the housing. This manifests itself as sluggish shifting from big cogs to ...

I'm having the feeling of going back to basics, being able to feel the exposed shifter / brake cable taut across the frame and being able to pluck on it like a well tuned guitar.

Internal routing offers a sleek, modern appearance by hiding cables inside the frame, while external routing exposes cables for a traditional look. External routing allows easier access for ...

External cable routing is simpler, with all cables secured along the outside of the frame, making it easier to install and maintain. It is commonly found on older aluminum or entry-level bicycle ...
