

Micro-optic couplers, built by coupling two lensed fiber collimators with an optical element in between, provide ultra-broad bandwidth (&#177;200 nm), high polarization extinction ratio (>30 dB), excellent ...

Fiber coupler devices are key optical components used within modules and systems and also passive optical access networks, to enable efficient long-distance signal transmission, monitoring, ...

Our SM and double-clad fiber coupler offerings also include a selection of components ideal for OCT applications.

This compact fiber translator uses our vibration-resistant OTX.5 series multi-axis optic positioners, which can take a 3G jolt without moving, as the basis for the design. 100 TPI hex adjustment screws ...

Our ultra-low polarization dependent loss couplers offer low levels of sensitivity to polarization, enable more effective monitoring and management of optical networks. These couplers are available in a ...

Sch&#228;fer+Kirchhoff's high precision fiber couplers (fiber port) are optimized for high pointing stability and long-term stability. They provide efficient coupling of &#173;collimated laser radiation into &#173;single-mode and ...

Control signal strength and split optical paths with Amphenol FOP's durable fiber attenuators and precision optical couplers-ideal for telecom, data centers, and test setups.

Explore our variety of fiber optic connector types designed to ensure reliable, trouble-free connections in your network. From LC, SC, ST and MTP/MPO connectors to specialized options such as FC and ...

Optics Fiber Optics Fiber Optic Components Fiber Optic Couplers Fiber Optic Couplers Fiber-optic couplers are used to split or combine the light contained in optical fibers. Show Filters:

Discover fiber optic couplers for network connectivity. Find SC, LC, and ST adapters with low insertion loss for reliable connections.
