

Optical Rails Small 25-mm Rails and Carriers Medium 50-mm Rails and Carriers Large 100-mm Rails and Carriers Optical Rails & Carriers with Millimeter Scales Leveling Feet for 50- and 100-mm Rails ...

Thorlabs also offers a range of fixed and adjustable collimation packages for collimating a laser beam from the end of an FC/PC, FC/APC, or SMA connectorized fiber while maintaining diffraction-limited ...

This fiber collimators buying guide provides technical background, comparison of major types, selection criteria, and an overview of suppliers.

The fiber optic collimator utilizes a PCX lens positioned at the focal length from the optical fiber tip. These collimators are available with FC or SMA threads, and easily couple to standard 0.22 NA fiber ...

LightPath®; Fiber Optic Collimators are designed so that they can be used in pairs to couple the input and output light of optical devices. Optimum performance for long-term use is ensured by the factory ...

Explore 28 top manufacturers and suppliers of Fiber Optic Collimators in our comprehensive photonics buyers" guide.

Fiber-optic collimators are used to launch the light from an optical fiber into a free space collimated beam with specified beam diameter or spot size. They can also be used in reverse to focus light into ...

With over 20 years of industry leadership, we leverage proprietary technologies -- including unique fiber-end lensing, precision V-groove assembly, and custom-built metrology instruments -- to ...

OZ Optics Online. Collimators.

Fixed fiber-optic collimators are designed to accept FC or SMA terminated optical fibers and collimate a beam exiting a single-mode fiber to a 2.0 mm to 3.0 mm beam.
