

Fiber Optic Patch Cord Stripping Machine Principle and Price

The FBT-3000 automatic fiber peeling machine is a new type of optical cable end processing equipment, which is based on the eagerness of optical fiber connector manufacturers to improve production ...

It is used for stripping LSZH/PVC jacket, according to the required length and cutting the strength member (FRP or Steel wire) in Flat drop cable, instead of manual stripper.

Engineered for efficiency and accuracy, this model integrates both wire stripping and cable jacket splitting functions, making it an ideal solution for manufacturers and technicians working with delicate ...

We are composed of a group of experienced optical fiber professionals, who are engaged in the polishing and assembling of optical fiber connector, outdoor equipment installation, transmission ...

The B300 is a universal, programmable strip machine for cables from 0.03 to 8 mm² (32 to 8 AWG), and a diameter of up to 7 mm. It is quick to deploy and is extremely easy to operate without programming ...

The design of this machine is original and novel, the operation of the machine is in accordance with ergonomics, and it is suitable for automatic peeling 2 / 8 core banded fiber.

Below is a comprehensive breakdown of the four main types of fiber optic stripping machines available today. Simple, handheld tools with precision-calibrated notches for different fiber diameters. ...

Fiber Cable Stripping Machines are devices used to remove the outer jacket of fiber optic cables. These machines are commonly used in the manufacturing and maintenance of fiber optic cables to expose ...

1.ST-3000T has multi-function, which includes stripping jacket, cutting aramid at the same time. It has high efficiency and save 30-50% labor cost of the process. 2 use original pneumatic part, original ...
