

Couplers / Splitters by AFL include Planar lightwave circuit splitters, LGX optical couplers, wideband couplers, ruggedized couplers and FTTx video modules.

Optical splitters and couplers split or combine light--distributing signals injected into a single fiber strand to multiple fibers, enabling point to multi-point communication in Fiber To The Home (FTTH) ...

Polarizing beamsplitters split incoming light into two orthogonal states. They can also be used to combine the light from two fibers into a single output fiber. When used as a beam combiner, each ...

Newport's Fiber Optic Coupler family has been developed using fused fiber technology. These multimode fiber optic couplers allow bi-directional coupling and can be used to either split or combine ...

Single mode & multimode couplers available online from Fibertronics with same day shipping. The available split counts are 1x2 and 2x2 or 1x4 1X8.

We offer a full line of fiber optic couplers and splitters supporting SM, MM, PM, large core, and double-clad fibers across 300-2000 nm, with power handling up to 100 W and operating temperatures up to ...

Our SM and double-clad fiber coupler offerings also include a selection of components ideal for OCT applications.

Timbercon's fiber optic couplers and splitters utilize precision technology to combine or distribute light from single/multiple inputs to single/multiple outputs.

Get low-loss fiber optic adapters/couplers with good repeatability and durability for precisely mating two ends of a fiber optic cable. Multiple connector options available.

Fiber optic couplers provide the high-precision capability to combine or split light signals in optical networks. In complex communication systems, an optical coupler is a junction point, ensuring ...
