

Fiber optic cables, widely trusted for delivering fast and secure internet, have now been shown to pose an unexpected privacy risk. A new 2026 research study reveals that these cables can ...

Unexpected eavesdropping risk: Researchers found that AI and DAS can turn fiber optic cables into vibration sensors capable of reconstructing conversations and other nearby sounds. How it works ...

A covert acoustic eavesdropping attack that transforms standard FTTH telecom fiber cables into passive, undetectable listening devices invisible to RF scanners and immune to ultrasonic ...

Researchers from Hong Kong recently made a startling discovery, they can covertly turn a standard fiber optic internet connection into a microphone that can record your conversations, no ...

With minimal cable access, commercially available tools and AI, attackers can technically listen in to your conversations via your fiber optic cables.

What are the 10 best foods for fiber? Some top choices to add to the diet are chickpeas, lentils, split peas, oats, apples, pears, almonds, chia seeds, Brussels sprouts, and avocado.

If the goal is to add more fiber to your diet, there are lots of great options. Fruits, vegetables, grains, beans, peas and lentils all help you reach that daily fiber goal.

Get the facts on dietary fiber foods (soluble, insoluble), high-fiber foods, its health benefits (weight loss), and why it's important to get your daily intake of fiber.

Researchers show how standard fiber-optic internet cables can be turned into covert listening devices, capable of capturing conversations without detection.

Eat more fiber with six easy expert tips for daily gut health and digestion. Learn simple ways to add fiber to your diet, including foods and habits to try.

A fiber optic cable carries pulses of laser light. When sound waves--like your voice or a car driving by--hit the ground or a wall near the cable, they create tiny vibrations.

Chia seeds, blackberries, kidney beans and lentils top the list of foods high in fiber. Fiber keeps your digestion regular and lowers your risk of some cancers.

Fiber is found in plant-based foods, particularly beans, nuts, fruits, and vegetables. Fiber has many health

benefits, including reducing risk of cardiovascular disease, type 2 diabetes, and ...

A new study has revealed that fibre optic internet cables can potentially detect and recover nearby conversations by sensing tiny sound vibrations, raising fresh concerns over privacy and ...

The recommended amount of fiber is 21-25 grams per day for women and 30-38 grams per day for men (at least 14 grams for every 1000 calories). Increase fiber in your diet slowly to avoid side effects.

But a recent breakthrough by cybersecurity researchers has exposed a chilling reality: the same fiber optic cables that deliver blazing-fast web connections can be weaponized as ultra-stealthy ...
