

Gd Pro™; Max Youth Add is an enhanced single vision lens that helps to relax tired eyes and prevents from adding further eye strain. It has been designed to help reduce visual fatigue caused by screens ...

MALTA, N.Y., May 4, 2026 - GlobalFoundries (Nasdaq: GFS) (GF) today announced the introduction of its SCALE(TM) optical module solution for co-packaged optics (CPO). GF's SCALE ...

Take advantage of the economical and reproducible solutions from GD Optics. Diffractive optical elements (DOEs) are used in many high-tech areas - whether in medicine, automotive and ...

The SCALE CPO solution uses both coarse and dense wavelength-division multiplexing (CWDM and DWDM) for bi-directional data transmission over each optical fiber, delivering significant ...

GD Pro &™; DriveMotion is the personalized progressive lens that incorporates a power of distribution specifically adapted for driving. It includes a night vision zone for a greater visual quality and less ...

GD Pro's variable base curve reduces oblique aberrations, while GD Pro &™; design technology compensates and optimizes the back surface visual fields. Each unique wearer receives a fully ...

GD Optics develops and manufactures high-precision optical glass components for demanding high-tech applications such as laser beam shaping, LiDAR sensors, measurement technology and industrial ...

We have extensive know-how in the field of micro-optics, which enables us to develop and offer customized solutions for a wide range of applications in photonics, medical imaging and optical ...

Optical technologies in micro format are the pioneers for industrial innovations of the 21st century. GD Optics is one of the leading protagonists in the production of optical components for high-tech ...
