

Thank you for choosing Rexarc for your industrial gas distribution needs. All Rexarc gas distribution systems in this catalog come complete as a system with single part number identifying a family of ...

Distribute welding wire according to the "first in, first out" principle to minimize product inventory time. Generally speaking, the amount of welding wire shipped out of the warehouse should not exceed two ...

The Welding Enclosures are ideal for small production quantities of items that need total gas coverage as well as single large items with critical joints. A combination of translucent material and optically ...

In the end, the ideal shielding gas is chosen after all the options are considered - not just the options that are "in stock." Your Nippon Sanso Matheson Gas Professional can help you navigate the options ...

This high-performance wire is self-shielding, meaning it doesn't require an external shielding gas, making it ideal for outdoor or field welding. It is formulated to provide exceptional corrosion ...

Thermco designs industrial gas mixers (gas blenders), gas analyzers, and alarm systems for welding shield gas, food packaging, furnace atmospheres, and other applications.

MaxxPak components are included and ready for direct connection for up to five different welding stations.

ER70S-6 contains higher levels of manganese and silicon than the other standard grades of MIG wire. This wire features excellent tolerance of rust and scale, produces the highest deposit ...

Gas-Shielded Flux-Cored Designed for use with CO₂ or argon mixes, our gas-shielded, flux-cored wires deliver superior arc performance. Self-Shielded Flux-Cored Brings the productivity of wire welding to ...

Survitec Ac/Ox Gas Distribution system is a safe, efficient and economical solution. It is based on safe and correct storing of the gas cylinders on board, in a well-ventilated room with direct access to an ...

Find quality shielding gas cylinders with CGA 580 valves. Perfect for carbon steel and steel welding projects.

Built to withstand the demanding conditions of welding environments, this distribution box is an essential component for ensuring the safe and efficient operation of welding systems on construction sites and ...

Gas Boxes (also known as Gas Cabinets) offer a safe housing for cylinder storage, regulators, and piping maintaining containment and simplifying installation. Both components streamline gas ...
