

Sophisticated systems for dry sorting and separation are vital for successfully recovering your recyclables. More than 35 years of expertise in recycling: Quality made in Germany. The recycling ...

This revolutionary optical sorter integrates advanced RGB and hyperspectral cameras with cutting-edge BRAIN AI software, delivering unmatched accuracy and efficiency.

Find a PETKUS Rep. Products . Sorting . Cleaners .

Self-cleaning overhead suspension magnets reliably extract even coarse iron. The MSort product range has been part of the STEINERT GmbH product range since July 2024. The MSort product brand ...

The optical sorters are built with detection systems from one to six channels according to the separation needs of the customer and the material to be treated. The color and size recognition technology ...

Make the most of secondary raw materials with our advanced optical sorting systems designed for waste recycling and metal recovery. We develop all sensors, mechanics, and software in-house for you to ...

GOU 6 is six channel unidirectional galvanic separator for electricity meter output. It used to separate an output from industrial and utility electricity meters.

Tailor your solution with a versatile combination of sensors, detectors, and separators in a single device. Unwanted materials are precisely ejected from the material flow using separation systems like air jets ...

Optical PET sorting with MEYER machines is a process that allows for the precise separation of valuable materials from contaminants. Thanks to advanced optical technology, our devices ...

High-performance, automatic system for optical sorting of packaging, plastics, metals and similar materials. Details. Ballistic Separator for multi-fraction separation of packaging materials, household, ...
