

CommScope designs and manufactures a comprehensive line of fiber optic cables--from outside plant to indoor/outdoor and fire-rated indoor fiber cables.

Used for cabling in cable ducts with no external mechanical impacts, trays, tunnels, and collectors. The cable contains a central optical module with loosely laid fibers. The free space in the optical module ...

Unitube No Armored Outdoor Cable GYXY is a type of fiber optic cable designed for outdoor installations. The cable consists of a single central tube that contains multiple fibers, which are ...

The structure of the GYXY optical cable consists of a 250 $\mu$ m optical fiber encased in a loose tube made of high-modulus materials, filled with waterproof compounds inside.

The built in suspension stranded rope provides high tensile strength, enabling the cable suited for large span installation, resulting in time and installation cost savings. The suspension wire, being an ...

GYXY is an outdoor non-armored fiber optic cable with waterproof layer, built-in double parallel steel wire, single casing design, which is mainly used in the short overhead span distance, wet ...

Uni-tube Non-metallic Armored Optical Cable (GYGXY) Optical fibres are housed in a loose tube that is made of high-modulus plastic and filled with tube filling compound. The tube is armored with a layer ...

The single-mode fiber or multi-mode fiber is made of a high modulus polyester material in a loose tube, and the tube is filled with a waterproof compound. The loose tube is provided with water-blocking ...

The fibers, 250 $\mu$ m, are positioned in a loose tube made of a high modulus plastic. The tubes are filled with a water-resistant filling compound. Over the tube, water-blocking material is applied to keep the ...

Zion Communication offers the GYXY Unitube Non-Armored Optical Cable, designed for efficient and reliable signal transmission. This high-quality, non-armored cable features a unitube structure for ...
