

High-density data center cold aisle 800mm deep in stock

One solution is Armstrong Cool Shield(TM), a customized aisle containment system for data centers that improves cooling efficiency by physically separating hot and cold air streams.

Custom engineered hot and cold aisle containment solutions that keep your data center running smoothly and make your build-out be more efficient, too.

This wall beam aisle containment system is perfect for data center operators and facilities managers who need efficient thermal management for high-density server environments.

The SRK Data Series Cabinets have the capacity and quality to meet modern IT Data Center requirements for high density computing and networking. These 800 mm wide cabinets are available ...

Learn how data center containment systems support high-density performance with reliable and efficient cooling.

Our high-performance aisle containment and structural ceiling systems work within your data center design to optimize airflow, improve energy efficiency, and support scalable growth.

Modular designed frame made of cold roll steel, with thickness $\geq 1.2\text{mm}$ to ensure the firmness and security. Aisle containment in the data center requires that cabinets are aligned in a hot aisle/cold ...

With so many variables affecting airflow within a data center, it can be daunting to know where to start and how to get the most of airflow management improvements

Improve your data center's cooling and efficiency with our cold aisle containment integral roof. This solution prevents hot and cold air mixing, increasing your operational efficiency.

Cool Shield(TM) containment offers state-of-the-art hot and cold aisle containment solutions designed to maximize data center efficiency while significantly reducing ...

Cool Shield(TM) containment offers state-of-the-art hot and cold aisle containment solutions designed to maximize data center efficiency while significantly reducing power consumption.

High-density data center cold aisle 800mm deep in stock
