Welcome to this beautifully updated 4-bedroom, 2-bath home in desirable Almaden Valley, San Jose. This move-in ready home features luxury vinyl plank (LVP) flooring, recessed lighting, and spacious ...

An ADU typically requires a separate electrical panel, which is typically located on the primary residence adjacent to the meter serving the primary unit (not on the ADU itself).

Smaller units in single-family homes can sometimes run on a sub-panel installation connected to the home's main system, while larger or new construction detached ADUs may require a separate panel ...

Code requirements and energy efficient specifications now incorporate the following methods into a new or remodeled bedroom project. All lighting must be on either: on dimmer switches, or provide a ...

While uncommon in modern construction, panels are sometimes found in bedrooms in older homes or due to specific renovation layouts. The location of this distribution hub is governed by ...

If you're trying to power an additional room or you just need more circuits, adding an electrical subpanel is a simple way to extend your circuitry, which can power additional rooms and ...

A subpanel is essentially a smaller breaker box that feeds off your main panel, used to distribute power to a particular area (like a garage, an addition, or a second story) or to add circuit capacity when your ...
