

This tutorial is a detailed, practical guide to using the Optical Glass Cube Dichroic Dispersion Beam Splitter Prism (15x15x15mm, 50:50 split ratio) (Leobot Product #1598).

To rotate the beam splitter about the horizontal axis, loosen Screw A, adjust the bracket by hand until the beam is aligned with the target, and then tighten Screw A.

Wondering if you need a beam splitter for your microscope or slit lamp? Here's how to install one and what benefits it can offer.

These cutouts are set at 45° and maximize beam clearances at full travel. Available in front-adjust or top adjust configurations for flexibility of mounting in confined laser cavities.

C, S, and T-Mount Solutions for Mounting Cube and Plate Beamsplitters, Filters, and Mirrors

Newport offers a variety of standard mounts that are ideal for beamsplitting applications. Designed specifically to hold and position plate beamsplitters, the back side of our beam splitting top adjust ...
