

# How to use a thermal stripper for fiber optic wire stripping

Built-in rechargeable lithium battery makes tool portable for many fiber optics applications. Onboard (8) temperature level heating modes accommodate a variety for different buffer and fanout kit furcation ...

Explore Optical Fiber Stripper types and uses. Learn pro techniques for precise stripping to ensure reliable network performance with top tools.

The 3SAE Thermal Stripper Adjustable is a optical fiber stripping tool for fiber optic thermo-mechanical coating removal.

Prepare the Tool: Ensure the hot stripper is set to the correct temperature for the type of coating you're working with. Insert the Fiber: Carefully ...

The FIS Thermal Stripper makes stripping 900 $\mu$ m or 250 $\mu$ m fibers easy and reduces the chances of breaking a fiber compared to traditional mechanical methods.

The FIS Thermal Stripper makes stripping 900 $\mu$ m or 250 $\mu$ m fibers easy and reduces the chances of breaking a fiber compared to traditional ...

Clean the bare fiber with a lint free tissue or cotton swab with  $\geq 99\%$  isopropyl alcohol. Place the fiber into the holder (fiber holders sold separately) then put the holder into the thermal stripper slot. ...

Open both covers of the fixtures of the thermal stripper. Place the fiber holder (with fiber installed) onto the fixture pad of the thermal stripper. Turn ON the device by holding the Power button for ...

The stripper has an internal heating element which warms up and softens the tight buffer coating. The SOFT STRIP tool is simple to operate and will give you consistently precise strip and concentric ...

This product is optimized to remove 900 $\mu$ m or 250 $\mu$ m buffer from one or two fibers at once or ribbon fiber in preparation of cleaving a fiber for mechanical or fusion splicing.

Prepare the Tool: Ensure the hot stripper is set to the correct temperature for the type of coating you're working with. Insert the Fiber: Carefully insert the fiber optic cable into the stripping ...

The TSFB-125 is a compact, easy-to-use fiber optic stripping unit designed to thermo-mechanically remove coatings from optical fibers. See video.
