

Explore the Huawei S2700 Series managed Ethernet switches featuring advanced Layer 2 capabilities, PoE options, iStack stacking technology, security features

The S2700 utilizes cutting-edge switching technologies and Huawei Versatile Routing Platform (VRP) software to meet the demand for multi-service provisioning and access on Ethernet networks.

Huawei S2700-18TP-SI-AC is the entry-level access layer, layer 2 enterprise switch. It supports 16 Ethernet 10/100 ports, 2 dual-purpose 10/100/1000 or SFP, AC 110/220V.

Explore the Huawei S2700 Series managed Ethernet switches featuring advanced Layer 2 capabilities, PoE options, iStack stacking technology, ...

The S2700 supports centralized MAC address authentication and 802.1x authentication. It authenticates users based on statically or dynamically bound user information such as IP address, MAC address, ...

For details about the optional configuration and more information about the product, see the Configuration Guide for your switch on the Huawei support website.

S1700& S2700 Series: Access product manuals, HedEx documents, product images and visio stencils.

View and Download Huawei S2700 hardware installation and maintenance manual online. S2700 switch pdf manual download. Also for: S3700, S5700, S6700.

Example for Configuring a Layer 3 Switch to Work with a Router for Internet Access Layer 3 Switch Layer 3 switches provide the routing function, which indicates a network-layer function in the OSI ...

The S2700 can limit the number of MAC addresses learned on an interface to prevent packet flooding that occurs when an attacker frequently changes source MAC addresses. The switch supports strict ...
