

In industrial networks, industrial switches play a critical role, and the selection of their fiber interface types is crucial for building efficient and stable networks.

Explore Westermo's range of robust industrial fibre switches available with different management levels and a variety of port configurations.

Our products make use of SFP modules for multimode or singlemode fiber with LC connectors. Many of our switches support 1 or 2 fiber ports which are advantageous when daisy chain configurations are ...

To make the network scalable, it is important to choose a industrial fiber optic switch that is compatible and provides connectivity between multiple devices, such as printers, cameras, computers, ...

Explore our selection of industrial fiber optic switches for reliable and efficient network connectivity. Our industrial fiber switches are designed for durability and performance in harsh environments.

With AXIS D8308 Fiber Aggregation Switch you can connect multiple Axis devices using fiber midspans over long distances. It also enables easy expansion by simply adding more fiber or network switches.

Most modern fiber-enabled network switches require an SFP transceiver module featuring a duplex (two strand) multimode OM3 or duplex single mode OS2 connection with LC connectors. Direct attach ...

Explore industrial fiber optic Ethernet switches from a direct manufacturer. SFP, single-mode and multimode fiber switches available in unmanaged and managed designs.

Use industrial-standard network cables such as Cat5e and Cat6 to connect the switch to various terminal devices such as sensors, controllers, PLCs, and higher-level network devices such as ...

We offer Industrial Fiber Optic switches with wide range of configurations and features for deployment in industrial environments with high reliability and flexibility.
