

This document provides details about configuring Layer 2 Network Address Translation (NAT) on the Cisco Industrial Ethernet 2000 Series, Cisco Industrial Ethernet 4000 Series, Cisco Industrial ...

Machine builders can use the Allen-Bradley® 1783-NATR to deliver standard machines to end users without programming unique IP addresses. This enables machines to be added, moved, or replaced ...

The NAT-102 Series is an industrial NAT device that is designed to simplify the IP configuration of machines in existing network infrastructure in factory automation environments.

Industrial Ethernet switches are high-reliability and cost-effective network devices designed to be applied in harsh industrial environments where they are likely to be subject to shocks, vibration and extreme ...

Product Description NAT-102 2-port industrial Network Address Translation (NAT) devices, -10 to 60°C operating temperature

Industrial Ethernet switches are high-reliability and cost-effective network devices designed to be applied in harsh industrial environments where they are likely to ...

Our Stratix 5410 Industrial Distribution Switches offer an all gigabit platform with four 10 gigabit port options and Network Address Translation (NAT) capabilities for networks where high performance is ...

The Rockwell Stratix 5700 Series Industrial Ethernet Switches with Network Address Translation (NAT) is a Layer 2 implementation that provides “wire speed” 1:1 translations ideal for automation ...

Alternatively, you can use the NAT switch to connect a machine to multiple higher-level networks, such as production and diagnostics networks. You can choose from various NAT mechanisms: 1:1 NAT, ...

The NAT-108 Series is an industrial NAT device that is designed to simplify the IP configuration of machines in existing network infrastructure in factory automation environments.
