

Intelligent type optical communication tester in stock

Our products are in stock and can be shipped overnight to the Continental U.S. and Canada from one of our local warehouses. If you have any questions, our technical experts can help you.

It combines the functions of: an OTDR, optical power meter, light source and visual fault locator. In addition, it has the function of copper cable locator (operating in analog or digital mode), ...

Portable fiber optic tester for power, fault, and performance analysis for network maintenance.

BD8000 series otdr fiber tester are the first intelligent and high-precision test instrument equipped with cloud wireless transmission, intelligent optical cloud platform and other functions.

Fiber testers provide the precision needed to install, certify, and maintain high-speed optical networks. This category includes OLTS certifiers, OTDRs, optical power meters, light sources, and visual fault ...

Hand-held OTDRs build a virtual image of the fiber optic cable to determine the condition and performance capability of the fiber cable. These tools can also test components along the cable path ...

Our selection includes essential tools for measuring, testing, and ensuring the reliability of fiber optic networks. From power meters to OTDRs and inspection scopes, you'll find the right equipment to ...

With fiber test equipment, you can diagnose a faulty fiber optic network and get it running smoothly again. Whether you're using a fiber tester OTDR (Optical Time Domain Reflectometer) or a visual ...

The Noyes TurboTest 500B optical loss/return loss test sets are designed to measure loss and return loss on high speed digital or analog fiber optic spans in Telecom, CATV and IXC networks.

Buy full line of basic fiber testing equipment, like visual fault locator, laser module, power meter & light source from FS. Highly reliable, rugged, flexible, accurate ...
