

The ADSS/OPGW Metal Junction Box, also known as a splicing box or Metal Joint Junction Box, is designed to house fiber core splices for outdoor intermediate optical cables.

Furnished with four plugged cable ports (2 aluminum and 2 plastic) for either All-Dielectric Self-Supporting (ADSS) or Optical Ground Wire (OPGW) cables, the ...

Weatherproof metal junction box for ADSS and OPGW fiber optic cables. Ideal for telecom network protection, cable connection, and outdoor installation.

The metal joint box are applicable for connection protection of special optical cables, with the functions of direct and branch connection, with the maximum of 6 optical cables, which mainly for overhead rods ...

The ADSS/OPGW metal junction box is also called a splicing box that is designed to house the fiber core splices to the outdoor intermediate optical cable leading to the patch panel in the control room.

The metal optical cable splice closure is made of aluminum alloy with perfect seal. It features in high mechanical strength, good airtight and anti-corrosive. Having been sealed with sealing ring and ...

Our company only lists some of the technical parameters of the Optical Fiber Splice Closure/Joint Box/Joint Closure, we can produce different specifications according to customer needs.

We integrate the development and research, production and sale of copper system, fiber optic system and cable assembly..

Furnished with four plugged cable ports (2 aluminum and 2 plastic) for either All-Dielectric Self-Supporting (ADSS) or Optical Ground Wire (OPGW) cables, the splice enclosure can be pre ...

ADSS Joint Box OPGW metal junction boxes, also known as junction boxes, are designed to accommodate fiber optic splices to outdoor intermediate cables leading to control room patch panels.

Used for splicing of ADSS fiber. The box is made of high-strength engineering plastic adding inhibitor, so it bears excellence of high mechanical strength and good airproof performance.
