

At 42U, we know data centers. With over 20 years of providing cooling, power, monitoring, KVM Over IP and server management solutions to the data center, we are confident that our solutions will help you ...

Hot and cold air containment systems designed to maximize cooling predictability, ...

Complete cold aisle containment guide for data centers. Learn CAC benefits, implementation steps, and achieve 35% cooling cost reduction.

Our main products are server/IT racks, integrated Micro modular data center smart cabinet, cold/hot aisle containment, UPS, PDU, precision air conditioning, precision power distribution, etc.

As Japan accelerates its digital transformation, the integration of AI and automation within data center operations is poised to significantly impact the Cold Aisle Containment System...

The data center's enclosed channel system achieves energy efficiency by sealing off the cold/hot channels, effectively addressing the high energy consumption of traditional data center cooling systems.

Prefabricated 42U server rack with hot/cold aisle containment, 1100kg payload, modular UPS, and energy-efficient cooling. ANS/EIA compliant.

Data Center Hot & Cold Aisle Containment Features: Delivers controlled airflow, prevents hot/cold air mixing, and reduces cooling energy costs across the data center. Built for data centers, colocation ...

Our main products are server/IT racks, integrated Micro modular data center ...

Hot and cold air containment systems designed to maximize cooling predictability, capacity, and efficiency at the rack, row or room level.

Adhering to the ISO9001 quality management system, the company boasts a professional R& D center and testing laboratory. Its products have passed various authoritative tests and certifications, ...

Watch the 42u 45u Prefabricated Cold Aisle Containment for Modular Data Center video demo to see how it works, key features, and real-use scenarios. A helpful video guide before you buy.

A fully enclosed 42U micro data center with plug and play deployment, integrating UPS, cooling, and monitoring in a single smart cabinet for edge computing.
