

Lc elbow cold splice

Provides environmental seal and mechanical protection, eliminates the requirements for heat during installation using 3M Cold Shrink technology.

Prysmian offers a wide range of splices, terminations, load breaks, dead breaks and accessories in North America. These include a complete cold-shrink splice, a cold-shrink termination, and a ...

Cold shrinking the splice ensures concentric splice recovery. Even in tight installation spaces, Elased splices recover to give consistent insulation wall thickness.

The cold shrink splice body is a one-piece molded design made of specially formulated silicone rubbers, while the jacketing is made of EPDM rubber for physical protection.

3M(TM) 5545A Series Cold Shrink QS III Inline Splice Kit is specially designed to splice 46 kV tape, wire, LC and UniShield™ power cable. The kit contains 1 cold shrink splice body that has a specially ...

CSS series cold applied splice sealing products are made of specially formulated silicone rubber that offers excellent insulation and moisture proof sealing for in-line cable connector systems or elbow to ...

It is designed to splice tape shield, wire shield, LC shield, UniShield, JCN and flat strap shielded cables. Compact structure allows for installation in confined areas and requires less cable to be prepared.

The 3M(TM) Cold Shrink QS-III Shielded Cable Splices 5513A, 5514A, 5515A and 5516A Series are 15 kV class inline splices for joining tape shield, wire shield, UniShield™; or longitudinally corrugated (LC) ...

3M electrical splices feature cold shrink technology, which is engineered for easy installation by unwinding the inner core. Reduce the time, labor and cost that comes with electrical cable splicing. ...

The CSB and CSJ series of cold applied splice sealing products are made of specially formulated silicone rubber offering excellent insulation and moisture proof sealing for in-line cable connector ...
