

Discover high-quality light guides for efficient and reliable data transmission.

This guide is provided to assist with the design of control panels per ULT 508A, specifically for use in industrial machinery applications.

Durable: The Silicone Light Guide Columns are versatile and durable components designed to optimize the distribution and efficiency of light in various applications. ...

Changes in lighting can confuse people, slow down work, or lead to errors. This is where Light Guide Film (LGF) backlighting comes into play. This ...

In order to provide users with the information they need to operate the system safely, this manual provides a general explanation of operating principles, selection and installation of signaling columns ...

This link is generally located near the point where the main feeders enter the switch board or in the area of the main disconnect device where one is provided. To further comply with NEC and UL ...

By industry standards, an LED light source is considered end of life when it loses 30% of its light, or what is known as the L70 rating. The L70 rating is calculated with data provided by an LED ...

A light guide column is an optical component designed to efficiently transmit and direct light, commonly used in lighting systems, optical instruments, and industrial applications.

This document provides guidance on lighting for industrial environments. It discusses key lighting design considerations like illuminance levels, uniformity, and lighting for specific industrial tasks.

Interchangeable lampshade can be recombined to different stack light column. Install the Stack Light on to industrial machinery, in factories and assembly lines, or in broadcast studios.

Our range comprises front panel-mountable solutions, as well as vertical or horizontal versions for mounting on circuit boards, individual and multiple light guides, bar graph displays, different head ...

The utility model discloses a light guide column structure is through setting up pedestal, holder and a plurality of leaded light subassembly.
