

Manufacturer of Heating Equipment for Optical Cable Heat Shrink Tubing

JCW offers a full range of benchtop and freestanding heat shrinking machines for processing heat shrink tube and heat shrink terminals. We developed high-efficiency infrared shrinking systems for different ...

Across a wide range of applications, we deliver optimal heating temperatures, performance and control features for greater efficiency. Scroll down to view our portfolio, then connect with us for expert ...

SA-HP100 Wire tube thermal shrink processing machine is a double-sided infrared heating device. The upper heating surface of the device can be retracted, which is convenient for wire loading.

Wiring harness shrink tubing heating machine and cable tube shrink tunnel machine, heat shrink tube heater, heat shrink gun for cables, shrinkable tube processing machine. There are several models for ...

Produced by EUROLINIA heat shrink tubing ovens allow the tube and cable manufacturers to heat shrink tubes radially by exposing them to infrared heat.

Korisung offers different thermal heat shrink machines and infrared heat shrink machines for different wire sizes, heat shrink tubing types, and applications.

Across a wide range of applications, we deliver optimal heating temperatures, performance and control features for greater efficiency with our heat shrink machines and equipment. Scroll down to view our ...

Bettertech supplies heat shrink tubing heating machines, They use hot air or infrared radiation to cure the shrinkable tubing. To meet your different requirements, the heating time, processing temperature ...

Yuanhan offers a wide range of semi-automatic and fully automatic wire processing machines for labeling, winding, tying, cutting, stripping, bending, crimping, sealing, twisting, tinning and much ...

Belt Conveyor Oven for heat-shrinkable tubing, thermal processing and curing. The Model 185 Belt Conveyor Oven is an enhanced version of our Model 175, suitable for heating a variety of products, ...
