

All-Dielectric Self-Supporting (ADSS) cable is a specialized type of optical fiber cable for utility communications. It supports itself between structures without the need for conductive metal ...

ASU Fiber Optic Cable is a lightweight, all-dielectric aerial cable designed for short- to medium-span distribution networks. The ASU series uses FRP strength members and a loose tube fiber structure ...

The Mini ADSS ASU Fiber Cable is a compact, all-dielectric self-supporting aerial cable designed with a unique single-tube structure and dual FRP strength members for efficient short-span ...

AFL Mini-Span™; All-Dielectric Self-Supporting (ADSS) fiber optic cable is designed for outside plant aerial and duct applications in local and campus network loop architectures.

The Multicom MINI ADSS-ASU is an aerial, self-supporting fiber optic cable engineered for outdoor environments. It features an all-dielectric, loose tube design that integrates fiber protection with fiber ...

Gcabling is a professional fiber optic cable manufacturing company, has been a leading fiber optic cable supplier since 2002.

Lightweight 6/12 fiber ADSS cable for aerial deployment. Waterproof, dielectric design with FRP strength members. Ideal for OSP networks & CWDM transmission.

ASU cable is also known as Mini ADSS optical fiber. It is a kind of optical cable which is composed of all dielectric materials and contains necessary self-supporting system and it can be directly suspended ...

We are a manufacturer of ASU Micro Mini ADSS-Aerial Self-Supported dielectric Fiber Optic Cable, G.652D. We supply fiber optic Cable in competitive cost and short lead time.

ASU120 optical cables are self-supporting in spans of up to 120 meters, therefore, they are indicated for the passage of cables in environments where the poles are far apart, such as on roads and crossings ...
