

They are designed compliant to industry standards to terminate an RF over Glass (RFoG) communications network. The standard model uses a single fiber and receives downstream signals ...

The Broadcom's 820-nm Miniature Link Series of components are designed to provide cost-effective, high-performance fiber-optic communication links for information systems and industrial applications ...

In a significant technological leap, researchers from Nanjing University (NJU) have developed a miniaturized FSO system that promises to revolutionize high-speed wireless ...

The Mini-3GHD is a miniature, Fiber Optic 3Gb/s SDI Digital Video Transport System, supports 1080p 3Gbps SDI video formats. The standard Mini-3GHD system is designed to transport one (1) channel ...

In a significant technological leap, researchers from Nanjing University (NJU) have developed a miniaturized FSO system that promises to revolutionize ...

This device is an RF over Fiber Mini Transmitter/Receiver for sending 4Ghz over optical single mode fiber up to 20Km. This unit is used to extend many RF over fiber applications like communications, ...

The BullDog Mini can transport bidirectional 3G-SDI, IFB, and two MIC/line audios as well as, two serial data channels - all over a single strand of single-mode fiber.

Transmitters and receivers are directly compatible with popular "industry-standard" connectors: ST, SMA, SC and FC. They are completely specified with multiple fiber sizes; including 50/125 &#181;m, ...

A mini optical node is a compact fiber optic device used to receive and distribute optical signals, typically in smaller-scale or space-limited deployments like FTTH or MDUs.

Designed for microduct applications and air-assisted installation, MiniXtend cables are up to 50% smaller than standard loose-tube cables while supporting higher fiber counts in a compact footprint ...

This device is an RF over Fiber Mini Transmitter/Receiver for sending 4Ghz over ...

Using ruggedized thermoplastic material as a cost-effective, top-quality alternative to traditional metal armored cable, OptiTuff(TM)Mini Fiber Cables offer superior durability and crush resistance compared ...
