

Cincon will continue to innovate in the power sector, providing customers with more efficient, more compact, and smarter power solutions to help global operators build greener, more reliable 5G and ...

At NextG Power, we've poured our expertise into creating the Reliable & Scalable Power for Next-Generation 5G Networks solution, designed specifically for 5G micro base stations.

Using new package innovations along with integrating FETs, inductors and compensation are great ways to achieve higher power density to save space and decrease the complexity and cost of ...

The working conversion efficiency is as high as 97.5%, supports external expansion of power supply capacity, and independent power-off function of DC shunt.

Power supply modulators are critical components for the implementation of mm-wave and sub-6GHz 5G systems, especially the base-stations.

Discover the factors that telecoms organizations need to consider for 5G infrastructure power design in the network periphery.

This application note provides a detailed description of the design considerations and experimental results of a high-efficiency, high-power-density, ultra-compact telecom rectifier for 5G small-cell and ...

We offer a comprehensive portfolio of products and services to help ensure peak power efficiency and performance across the life cycle of your 5G and wireless networks, delivering reduced operating ...

The new-generation super high-efficiency and high-density power system is used to supply power to 2/3/4G and 5G equipment, thus saving energy and reducing consumption.

In this article, we present a stackable and interleaving multiphase high voltage inverting buck-boost controller that will resolve all the requirements/challenges to meet today's 5G telecom equipment ...

Power supply for 5G Mast and eNodeB, 5G Network Switches, 5G Mobile Core and IDC, 5G DC and EDC, 5G Cell Site Gateway and Aggregation Router.

Efficient power management for RF power amplifiers (PAs) is emerging as a critical requirement for the development and adoption of next-generation wireless comm

FPS has a range of products designed to fit specific niches and improve power management for devices across the 5G ecosystem, from user equipment via masts, cell site gateways, aggregation routers, ...
