

Fibrecross offers high-performance 40G QSFP+ optical transceiver modules, designed for seamless integration into data centers, enterprise networks, and high-performance computing environments.

Optical amplifiers are devices for amplifying the optical power of light beams, either in free space or in waveguides such as optical fibers.

Direct OEM/ODM manufacturing of 40G QSFP+ and 50G SFP56/QSFP28 transceivers for 5G fronthaul & enterprise networks. 100% tested & MSA-compliant.

Product Description The OA4MVM3F Driver Amplifier is a general-purpose broadband amplifier designed especially for SONET OC-768 Mach-Zehnder optical modulator driver applications. Its ...

The OA4SMM4 is a dual input high performance broadband 43Gb/s Lithium Niobate or Electro-Absorption optical modulator driver amplifier with very low jitter, 4.5V amplitude, with excellent gain ...

The Opera-F is an optical parametric amplifier (OPA) that extends the performance of Coherent's Monaco amplifier. Opera-F delivers a broad tuning range, 650 nm to 900 nm and 1200 nm to 2500 nm.

Direct OEM/ODM manufacturing of 40G QSFP+ and 50G SFP56/50G QSFP28 optical transceivers for 5G fronthaul and enterprise networks. 100% tested and strictly MSA-compliant.

The portfolio addresses the analog interfaces between electrical and optical domains providing solutions to meet the demanding size, power and signal integrity requirements of today's high speed networks ...

The series of product adopts LC or MTP/MPO connector and operates over Single Mode or Multimode optical fiber. They can be used for connections from 150m up to 40km and are suitable for 40G ...

The module converts 4 input channels (ch) of 10Gb/s electrical data to 4 CWDM optical signals and multiplexes them into a single channel for 40Gb/s optical transmission.
