

AFL-ADSS (All-Dielectric Self-Supporting) fiber optic cable is designed for outside plant aerial transmission and distribution environments. As its name indicates, there are no metallic components ...

Product Description Optical Ground Wire (OPGW) cables are advanced composite overhead conductors that combine the functions of a ground wire and optical fiber communication within a single integrated ...

Gel filled multi loose tube cable with metallic armour of steel wires crown and double jacket for indoor / outdoor installation. The metallic armour provides an effective repellent for rodents (extreme ...

AFL HexaCore OPGW (Optical Ground Wire) cable utilizes fiber-bearing stainless steel tubes stranded alongside aluminum clad steel and/or aluminum alloy wires to create a multi-layer cable design ...

Norden Multi Loose Tube Steel Wire Armoured Optical Cables are designed for long-distance communication and high-speed data transmission, making them ideal for building interconnections, ...

This tough rugged cable is ideal for all external environments including direct burial, tunnels and heavy-duty ducts, where need water resistant, rodent resistant, flame retardant.

Stranded Stainless Steel Tube OPGW (SSST / Multi-Tube) is an overhead ground wire with integrated optical fibers. Instead of a single central tube, the optical fibers are housed in multiple stainless-steel ...

We offer a wide range of OPGW cables with stainless steel or aluminum tubes. They come in different types, such as single-layer, double-layer, multi-layer, etc. Our OPGW is available in ...

The stainless optical tube is located at the center of the cable protected by single or multiple layers of aluminum clad steel, aluminum alloy wires, or steel wires.

This cable is made up of loose tubes of high-strength plastic with each one filled with a water-blocking compound to protect the fibers. The strength member of steel wire is positioned at the center of the ...

Two or three stainless steel optical tubes are helically stranded in the inner layer of a multiple-layer cable. The multi loose tube type is designed mostly for very high fiber count requirement over 48 with ...

Available in gel or dry designs with outside plant (OSP), plenum, riser and indoor/outdoor low smoke zero halogen (LSZH) ratings, with aluminum interlocked, steel wire or corrugated steel armor options.
