

NEMA4X Supplier for Data Center Hot Aisles

Whether you need to support a high compute data center for AI or have massive cloud storage needs or have a location that requires a fully customized solution, we can help.

We provide the best solution to eliminate hot and cold air from mixing between aisles regardless of rack configuration and other design challenges. Whether it's live environment or new construction, ...

We can design and engineer fully customized hot aisle containment components to help optimize your data center's cooling efficiency. We will work closely with your team to design a system that includes ...

Whether ceiling hung or integrated with aisle structure, our containment solutions are manufactured on our dedicated lines for quality, accountability, and fast lead-times.

Rittal's new aisle containment line solves these problems with a modular, standards-based design that integrates easily with existing racks, cabling, HVAC, and safety systems.

Sliding Doors offer data centers aisle-end containment in just minutes and without the need for contract labor. The one-tool design allows for quick and easy installation, removal, and re-installation with ...

Find out how to improve your data center infrastructure efficiency, using the cold aisle containment or hot aisle containment solutions from Vertiv.

An aisle containment system is a simple way to improve cooling efficiency in hot aisle/cold aisle rack configurations. Essentially creating a room within the aisle, the system helps keep hot and cold air ...

Altimir Data Center Solutions designs, fabricates, and installs high quality, custom engineered Hot Aisle and Cold Aisle containment systems for data centers worldwide.

Lightweight, engineered extrusions specifically for data center aisle containment. Mitered corners and press-fit, reinforced corner inserts for longevity, optimal sealing, and improved aesthetics.
