

New Anti-Catling Optical Cable from Ukraine

Ukrainian units have found an interesting solution for covering rear facilities and supply routes where fiber-optic UAVs most often ambush. These are simple engineering barriers made of ...

Drone warfare is common in Ukraine, but a new evolution in the conflict is leaving a strange web of fiber optic cables strewn across the battlefield.

Ukraine has been struggling with Russian drones that attack tens of kilometers behind the front line, dragging an optical cable behind them to protect against radio interference. However, the ...

Compact optical cables for building subscriber lines in FTTH networks. Designed for installation from the optical distribution point to the subscriber's premises. Suitable for facade, indoor or outdoor ...

What are fibre-optic drones, and how do they work? Fibre-optic drones are cable-guided attack drones used by Hezbollah against Israeli troops. The drones bypass electronic jamming, fly ...

The new technology is capable of jamming even drones using fiber-optic cables The Ukrainian Ministry of Defense is developing small-scale air defense capabilities amid constant attacks by Russian ...

Ukraine has been struggling with Russian drones that attack tens of kilometers behind the front line, dragging an optical cable behind them to protect ...

Synergia SE specializes in structured cable systems, including central loose tube fiber optic cables designed for outdoor use. Their products feature steel tape armor and a durable HDPE sheath, ...

A Ukrainian front-line city has been smothered by a giant web of fibre optic cable from hundreds of drone battles in the skies.

In Ukraine, soldiers have also been deployed with scissors. Once a drone passes overhead, they rush to the fiber-optic cable trailing behind it and cut it.

First-person-view (FPV) drones controlled via fiber-optic cables have proved nearly impossible to counter since emerging in 2024 in the war in Ukraine. But recent battlefield images ...
