

For fiber work in communities and cities, Vermeer has the full equipment lineup and is sized for your fiber-installation needs. Choose from a wide range of machine options and the support equipment ...

By utilizing specialized equipment, we create narrow, shallow trenches in which fiber optic cables can be safely laid and then quickly covered, reducing the construction footprint and accelerating project ...

Simex offers a range of products for trenching for utilities installation, such as fiber optic networks, pipelines or conduits. Specifically, Simex offers a full range of wheel saws used successfully for ...

Using specially designed saw blades, the Ditch Witch MT12 microtrencher cuts through asphalt for fiber-optic cable installation--from 0.75 to 1.25 inches wide and up to 12 inches deep--in a single pass.

Tesmec trenchers are a clean and fast technology for in-line excavations for the installation of urban fiber optic networks (FTTx), suburban networks (city rings) and long-distance networks (backbone).

The TRENCH" edge Rotary Trencher can be the most cost effective way of installing fiber optic cable in the last 100 yards of (FTTH) fiber to the home. Our trenchers can cut trenches one (1") wide by ...

Discover KEMROC"s advanced cable trenching solutions for efficient and precise trenching. Ideal for utility installations and micro trenching projects.

Lay down fiber with minimal disruption to the surrounding area and speed up the microtrenching process with the MT12. Only from Ditch Witch.

Tesmec trenchers are used for the installation of underground conduits for telecommunication networks. We provide a complete range of clean and fast solutions for Urban Fiber networks (FTTx), Suburban ...

Microtrenching is used for installing fiber-optic cables, low-voltage power utilities and more. Discover Vermeer microtrenching solutions and support equipment.
