

The company's core offerings include pluggable optical transceiver modules, transponders and optical components that enable data transmission at rates ranging from 1G to 400G.

Our in-depth market data report on Optical Module Industry. Explore verified statistics and the latest research.

MPS reported record Q1 revenue of \$804 million, up 7% sequentially and 26% year-over-year, driven by a 33% sequential surge in the communications end market (optical ...

Chinese optical module stocks diverged in Q1 2026, as Innolight reported a 262% profit surge while Eoptolink faced margin pressure amid 800G price wars.

As a result, just a month after the OCI standard was announced, year-to-date, GF announced its complete optical module solution for NPO and CPO, known as scale or silicon ...

The sharp increase in performance in the first quarter was mainly due to an increase in sales of high-end optical modules such as 800G and 400G due to the increase in computing power ...

At the recent Optical Fiber Conference, Arista unveiled extended pluggable optics (XPO), a form factor designed specifically for optics at high speed, and assembled 45 optics module...

Market growth: The optical transceiver modules market is experiencing unusual growth from AI infrastructure, cloud networking, and telecommunications 5G/6G build-out, with Q1 2026 defense ...

The target? Scaling capacity from 100k to 250k 800G modules per month by year-end. Operating leverage is the only path to GAAP profitability. 3 1.6T is Officially Real: Management ...

The figure below illustrates the changes in the TOP10 list of optical transceiver suppliers over the last 15 years. A majority of the Japanese and US-based suppliers exited this market by 2020, while Chinese ...
