

Adaptable to hot and cold aisle containment, the Vertiv Aisle Containment system allows you to deploy containment before or after racks are installed to simplify installation and speed deployment of new ...

Our high-performance aisle containment and structural ceiling systems work within your data center design to optimize airflow, improve energy efficiency, and support scalable growth.

Cold aisle containment encloses the cold aisles to ensure only cold air is supplied to servers. This approach is normally used with in-row cooling and raised floors and is more common in retrofits. ...

Adaptable to hot and cold aisle containment, the Aisle Containment system allows you to deploy containment before or after racks are installed to simplify installation and speed deployment of new ...

Explore hot and cold aisle containment systems, including doors, panels, and ceilings. Improve data center airflow, cooling efficiency, and energy savings with customizable solutions today!

The goal of a hot or cold aisle configuration is to conserve energy and lower cooling costs by managing air flow. Designing the proper containment system requires lining server racks in rows (or aisles) with ...

Cold aisle containment works in virtually any data center using traditional air cooling, but some facilities see faster returns than others. If you're delivering cold air through a raised floor with perforated tiles, ...

The components are organized into modular kits and come with assembly hardware for easy step-by-step installation. Depending on your hot-aisle/cool-aisle needs, you can select from an assortment of ...

Hot & Cold Aisle Containment Panels at bulk/wholesale pricing. Used for aisle containment solutions in mission-critical data centers to ensure consistent temps.

Our modular containment solution and line of aisle airflow management products are specifically designed to block airflow, ensuring hot and cold aisle separation.
