101 Skills: Percutaneous Pigtail Catheter Placement CTSNetVideo 83.3K subscribers Subscribed

Pigtails should replace chest tubes for most pneumothoraces and pleural effusions requiring drainage. In this episode, I discuss points on use and placement. The next post will be a ...

Insert the obturator all the way into the pigtail catheter with the stop cock, and lock it in place. This will ensure that your chest tube is rigid and make it easy to feed over the guidewire and through the chest wall.

Small-bore chest tubes - also referred to as pigtail catheters - are being used to relieve both spontaneous and in some cases, traumatic pneumothorax. These pigtails are placed with a ...

For the procedure of tube thoracostomy, trainees will be able to:
